

REMOVES:

Mud

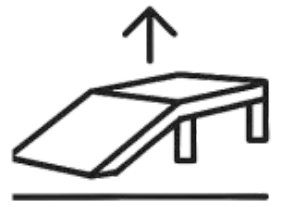

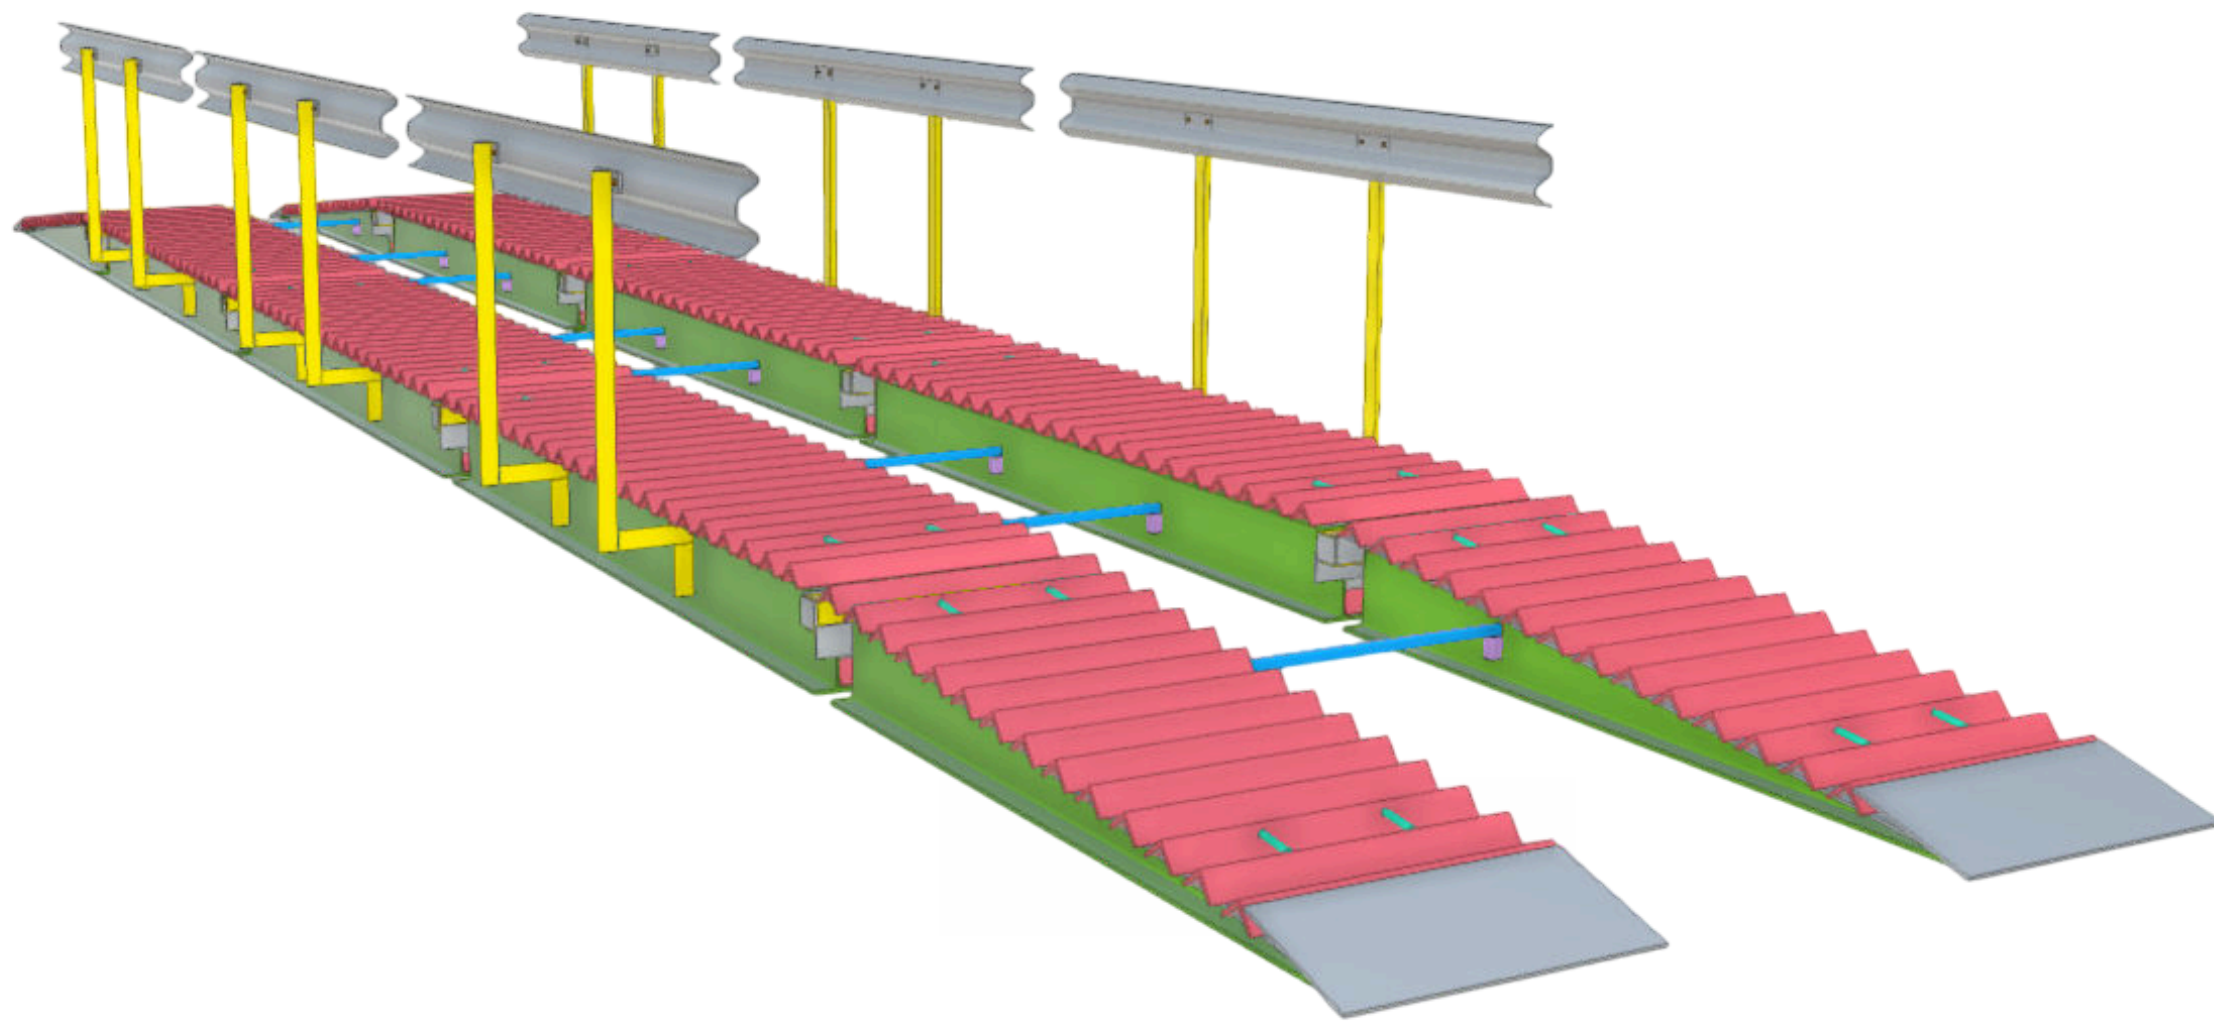

Dirt

Debris

Adaptable **Load & Length** for any vehicle type.

100% ABOVE
GROUND

NO WATER

NO ELECTRICITY

NO CIVILS

Specifications

Product ID: MWC-12T

Load: 12 tonne per axle (Also available in 20T / 30T & Custom)

Length: 10 m, 18 m, 22 m modular pad lengths available

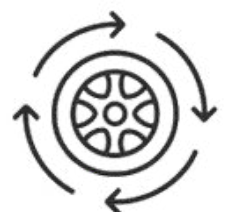

Width: 3.06 m

Cleaning Method: Vibration effect & mechanical tyre flex over rumble grids

Surface Finish: Hot-dip galvanised steel pads and ramps

Construction: Heavy-duty steel modular pads with no nuts & bolts, gravity drop assembly

Installation: Time Under 2 hour

3 WHEEL
ROTATIONS

Section Size

Ramps: 3000mm x 1000mm x 380mm

Main Section: 4000mm x 1000mm x 380mm

Safety Barriers: 3600mm x 1300mm

GRAVITY-ASSISTED
DROP-THROUGH

Product Summary

Dry Modular Wheel Cleaning System 100% above ground, waterless and powerless modular unit for cleaning vehicle tyres via vibration effect & mechanical tyre flexing when driving over rumble grids. No water, no power, no civil works or council approvals required.

Vehicles pass slowly (2–5 km/h recommended) to achieve three tyre rotations over the cleaning pad. Pads connect via gravity assisted drop assembly, no mechanical fasteners required.
